

SAKKTHINAGARAJ A P

Python AWS Data Engineer | Django | AWS Glue | Lambda | ETL | Vue.js

Coimbatore, Tamil Nadu, India

+91 8667218036 |  GitHub: <https://github.com/Sakthi93> |  asakthinagaraj93@gmail.com

Profile

Full Stack Software Engineer with 5+ years of experience building scalable backend systems, cloud-native applications, and modern front-end interfaces. Skilled in Python, Django, FastAPI, Vue.js, React.js, Next.js and AWS. Experienced in building secure, scalable microservices with JWT/OAuth2 authentication and CI/CD pipelines on AWS.

Work Experience

Full stack LLM Development Analyst — Accenture Solutions

Project: IPU Optimization | *Data Engineer* | Jan 2025 – Mar 2025

- Migrated and redesigned data workflows from Informatica to AWS, achieving **up to 50% cost reduction**.
- Built scalable cloud data architecture using **S3, Lambda, Step Functions, SQS, SNS, and DynamoDB**.
- Optimized the end-to-end solution for performance, cost efficiency, and seamless cloud operations.

Project: Project Alexandria | *Data Warehouse Engineer* | July 2025 – Feb2026

- Designed and developed a scalable, high-performance cloud architecture, **improving system reliability by 40%**.
- Engineered reusable AWS-based components with S3, Lambda, Step Functions, SQS, SNS, SES, DynamoDB, and DynamoDB Streams, accelerating development and promoting code reusability across projects.
- Developed a responsive self-service portal using Next.js and Tailwind CSS, delivering a modern user experience and increasing platform accessibility.

Project: Project CDA DAP migration| *Data Engineer* | Feb 2026 – Present

- **Migrated** and **modernized** data workflows from 5+ legacy/source environments to Amazon Web Services using AWS Glue and Medallion Architecture, reducing **manual processing effort** and improving **data availability**.
- Built **scalable** cloud-based ETL pipelines using **Amazon S3, AWS Glue, Lambda, Step Functions**, and **SQS**, **improving** pipeline reliability by and **reducing** execution time.
- Migrated and optimized **20+** Fivetran models and Databricks notebooks/code, enabling faster analytics delivery and reducing maintenance effort.

Senior Software Engineer — Talentztech Solution

Apr 2024 – May 2024 | Tiruchirappalli

Project: Welcome CRM| *Senior Software Engineer* | Apr 2024 – May 2024

- **Configured** the front-end project to align with client requirements, enhancing the overall project clarity and **user experience**.
- **Designed** and **implemented** a dynamic table to **store** and display API response data, ensuring seamless integration with back-end services.
- **Achieved data accuracy** through careful implementation, resulting in increased project clarity and **improved** user interaction.

Software Engineer Trainee / Software Engineer — EC Group Datasoft

Sept 2020 – Mar 2024 | Chennai

- Improved maintainability and scalability of multiple enterprise applications (Strategy AI, Pinnit, Strategy Cascader, Waypoint, Campus) by developing backend services using Python Django REST Framework and .NET, reducing system complexity.
- Addressed inefficient data handling in legacy services by designing and developing optimized Python-based backend APIs, improving data storage and retrieval performance.
- Resolved inconsistent and heavy UI rendering issues by building and optimizing Vue.js (Vue 2 and Vue 3) components, improving user experience and responsiveness.
- Implemented an event-driven workflow using AWS S3, Lambda, and SNS to automate file processing, reducing manual intervention in backend operations.
- Reduced network dependency and improved processing efficiency by implementing DOCX-to-PDF conversion and user event tracking within the application flow.
- Solved cross-team integration gaps by collaborating with UX/UI designers, product managers, and backend engineers to deliver end-to-end features.
- Migrated legacy Vue 2 components to Vue 3 to resolve maintainability issues and leverage modern framework capabilities.

Certifications

AWS Certified Cloud Practitioner

Credential ID : cdbee736-c753-4fc7-8e67-0732258a881e

Credly: https://www.credly.com/badges/cdbee736-c753-4fc7-8e67-0732258a881e/public_url

Education

SASTRA University

Master of Computer Applications [MCA]

Graduated with CGPA of 6.98

Jun 2017 — May 2019

Tanjore

Government Arts College

Bachelor of Computer Applications [BCA]

Graduated in first class with 68.6%

Jun 2014 — May 2017

Tiruchirappalli

Technical skills

- **Languages:** Python, Java, C, C++, Dot Net
- **Backend Development:** Django, Flask, FastAPI
- **Task scheduling:** Cron Jobs, Celery
- **Frontend Development:** Vue.js (Vue 2 & Vue 3), Vue Router, Axios, Vuex (Vue 2), Pinia (Vue 3), React.js, Next.js and OpenNext
- **Databases:** PostgreSQL, MySQL, Redis (in-memory database)
- **Cloud (AWS):** S3, Lambda, Step Functions, SQS, SNS, DynamoDB, DynamoDB Streams, Glue, Athena, Redshift, CloudWatch, SES, CloudFront, AppFlow
- **Infrastructure as Code (IaC):** Terraform
- **Containerization & CI/CD:** Docker, Docker Compose, GitHub Actions
- **Testing:** Pytest, Jest, Test-Driven Development (TDD)
- **API Security:** JWT Authentication, OAuth2, Role-Based Access Control (RBAC)
- **Architecture:** Microservices, Event-Driven Architecture
